

GAME OVERVIEW

Game Description (for Players)

Wilds countdown in Gods of Giza™

Varying coloured jewels are joined by Horus and Anubis symbols in this Egyptian-themed 5x5 slot, and they must form an adjacent cluster of three or more symbols to award a win. Winning symbols are removed from play with a cascade of new characters filling their position.

Each win also creates a wild allowing for subsequent wins to be created more easily. Wilds can also have a countdown attached to them which reduces by one for each win it is a part of before being removed from play. At least four scatters are needed to award 15 free spins, more scatters unlock additional spins with players being able to be awarded up to 120 spins in total!

Game Information

Base Game:

- After a win, the symbols (except Wild) that have been part of the win will disappear and the symbols above will fall down and take their place. The game will then play this new matrix of symbols as a new game with no cost to the player. This process may be repeated until there is no win.
- Before the new symbols fall in, the winning combination generates one Wild.
- Wild will appear on one of the win positions, which are not a part of win line with existing wilds. If there are no such positions, wild won't be generated.
- The new wild don't affect the current win and will play after new symbols fall in.
- Wilds can contribute to wins on 3 separate cascades and then they are removed after the third usage in base game.
- Wild has a random multiplier and keeps its multiplier for its entire lifespan.
- If the base spin doesn't have any win, there is a chance to activate a random wild replacement:
- 2-5 Wilds will be randomly placed on non scatter positions with random multipliers assigned to them.
- After a regular win evaluation, the cascading will play as usual
- Random wild replacement can't happen during cascading

TUMBLE FEATURE

The **TUMBLE FEATURE** means that after every spin, winning combinations are paid and all winning symbols disappear. The remaining symbols fall to the bottom of the screen and the empty positions are replaced with new symbols coming from above.

Tumbling will continue until no more winning combinations appear as a result of a tumble. All wins are added to the player's balance after all the tumbles resulted from a base spin have been played.

DEPLETING WILDS

The **WILD** symbol appears as a result of winning combinations. Every time at least one winning combination without any **WILD** hits, one **WILD** symbol will appear in a random empty spot after tumbling.

All **WILD** symbols will remain on the screen, falling along other symbols as part of tumbles, for 3 subsequent wins in the same tumble sequence. After the 3rd win with the same **WILD**, it explodes along with all other winning symbols.

Every time a **WILD** hits it can carry a random multiplier of x2, x3, x5, x7 or x10. The multiplier applies to all winning combinations forming with that **WILD**. If two or more **WILDS** are part of the same winning combination their multipliers multiply each other. The same **WILD** can be part of multiple winning combinations.

FREE SPINS

Hit 3 or more **SCATTER** symbols to trigger the free spins round with 10 free spins. For each **SCATTER** symbol hit in the base game on the triggering spin beyond the 3rd, 5 more free spins will be awarded in the subsequent round. Up to a maximum of 25 **SCATTERS** can hit in the base game in the same tumbling sequence, the equivalent of 120 free spins.

During the free spins round it is guaranteed that at least one **WILD** symbol will appear after the initial free spin, before any tumbles. If there are no winning combinations in the initial free spin at least one **WILD** symbol will appear in a random position.
