

GAME OVERVIEW

STICKY BEES™

STICKY
BEES™

Game Description (for Players)

Swarm around wild wins and harvest sweet rewards in Sticky Bees™

Create matching clusters of sweet fruits, from cherries and plums to strawberries and watermelons to unlock a win and trigger a cascade of new fruits from the top of the game board. At every spin, between 12 to 19 positions are randomly marked and upon a bee symbol landing on one of these circle spots, they will transform all other circles on the game board into wilds to create additional winning opportunities.

Seven free spins are awarded in the bonus where up to three bees can be triggered on each spin, upon activating a circle and creating a wild, these will remain active throughout all subsequent spins allowing for more wild positions to become available.

Game Information

Screen size:

- Screen size 7x7
- Bet multiplier x20
- Tumbling from top to down

13 Symbols:

- 10 Regular symbols
- 1 Wild
- 1 Scatter: doesn't pay, triggers Free Spins
- 1 Super Wild Activates pattern position

Game Information

Tumbling:

- Triggered by any winning combination (with 5 or more symbols of the same type in a stack).
- All symbols in winning combinations will disappear.
- Empty spaces are filled as symbols tumble in sequence from above.
- The reels are evaluated again for winning symbol combinations.
- Tumbles continue until no winning symbol combinations appear.
- Can be triggered during base game and free game.

Screen Pattern:

- Screen position can have 3 states: blank, deactivated, and activated.
- Blank position acts as usual.
- Deactivated position acts as usual but can be activated.
- When a position is activated, it becomes sticky wild.
- Pattern determines which positions are blank and which can be activated.
- Pattern selected randomly on the start of base spin (purchase or bonus boost trigger spin as well) and remains for all the base spin tumblings.

Game Information

Screen Pattern :

- Pattern selected randomly on the first Free game spin remains the entire FG feature.
- Activated position can be selected to be activated again, but that doesn't change anything for it.
- Activated position can't be deactivated and remains sticky wild till the end of base spin or the entire Free Game feature.
- If scatter on a position that has become activated, or if scatter falls down during tumbling on an activated position, or if scatter during free spin lands on the activated position – in all these cases the scatter has been collected before converting to the wild symbol.

Super Wild symbol mechanics:

- Can land only during base game, purchase or bonus boost trigger spin and their tumblings.
- When lands on deactivated or activated position, SWD activates it and additionally 2-6 non-blank positions (already activated positions can be selected, and the position of SWD can be selected).
- If it lands on a blank position, it acts as usual wild and burns in case it is part of a win.
- Can fall down on a non-blank position during tumbling, and then it also provides the activation process.

This is the BONUS symbol. It appears on all reels.

TUMBLE FEATURE

The TUMBLE FEATURE means that after every spin, winning combinations are paid and all winning symbols disappear. The remaining symbols fall to the bottom of the screen and the empty positions are replaced with new symbols coming from above.

Tumbling will continue until no more winning combinations appear as a result of a tumble.

All wins are added to the player's balance after all of the tumbles resulted from a base spin have been played.

MARKED POSITIONS AND SUPER WILDS

At every spin any number between 12 and 19 positions on the grid are marked randomly.

This is the SUPER WILD symbol. It substitutes for all symbols except for BONUS symbol. It can appear on all reels.

Whenever a SUPER WILD hits in a marked position, as the result of a base spin or a tumble, it activates that respective position. When a marked position is activated, any symbol that is on it, is transformed into a WILD symbol. The marked position remains active until the end of all tumbles from the same base spin.

In base game, whenever a SUPER WILD hits a marked position, it send an additional 2, 3, 4, 5 or 6 other SUPER WILD symbols to other random marked positions, activating them until the end of all tumbles from the same base spin.
