TUMBLE FEATURE

The TUMBLE FEATURE means that after every spin, winning combinations are paid and all winning symbols disappear. The remaining symbols fall to the bottom of the screen and the empty positions are replaced with symbols coming from above.

Tumbling will continue until no more winning combinations appear as a result of a tumble.

There's no limit to the number of possible tumbles.

All wins are added to the player's balance after all of the tumbles resulted from a base spin have been played.

MULTIPLIER COLLECTION FEATURE

On top of the game there is a meter containing 3 locked multiplier values in the base game and 6 locked multiplier values during the FREE SPINS feature.

At every spin and all tumbles resulted from the same spin, the number of winning symbols and any exploded symbols is collected. At certain thresholds of collected symbols multipliers from the top unlock. At the end of all tumbles the total win of the tumble is multiplied by the highest multiplier unlocked, as follows:

1st Multiplier - random between 2x, 3x or 4x. Unlocks after 20 symbols exploded.

2nd Multiplier - random between 5x, 6x, 7x or 8x. Unlocks after 50 symbols exploded.

3rd Multiplier - random between 9x, 10x, 11x, 12x, 13x, 14x or 15x. Unlocks after 100 symbols exploded.

These are the BOMB symbols. They are present on all reels and can hit randomly during spins and tumbles in both base game and the FREE SPINS feature.

Whenever one or more BOMB symbols hit, they remain on the screen until there are no more winning combinations possible, tumbling down like all other symbols. Then they explode and remove all symbols from the screen in a horizontal, vertical, cross or X pattern. The removed symbols add to the multiplier collection meter and new symbols fall from the top. If new winning combinations appear as a result of this, the tumble sequence continues.

In the base game BOMB symbols explode only if at least one tumble has happened previously in the current spin.
