

Micro Knights

Restore order in the kingdom!

The reign of the Micro Knights

As the sun rises above the distant towers of Chatoux Prix, the dragon king Chalcedony orders all knights to take charge outside the kingdom walls. According to the king, all potential threats, big and small, must be eliminated to keep the kingdom safe. The task falls on the three valiant knights Sir Smash, Sir Charge, and Sir Count. The excitement rises as our heroes exit the castle gates and embark on their quest to restore order in the kingdom.

Micro Knights is an action-packed slot in the ELK Friends Series. This intense game offers a lot for the player to discover. Symbols drop down on the 7×7 symbol grid and clusters of 5 symbols or more generate wins. A queue of symbols provides an additional dimension to the game. It piles up and group symbols to be matched with symbols on the symbol grid to form new winning clusters. It also to boosts existing clusters generating higher wins.

Every symbol drop is exciting and all wins, small and big, contribute and increase the chance to trigger one flag feature after another.

Time to bring order in the kingdom!

The intriguing avalanches

Symbols fall down to fill the symbol grid. Winning clusters explode and give space for additional symbols to drop down from above, and they also contribute to fill up the Counting Knight's meter which in turn awards different life saving flag features. Avalanches can keep on for quite some time, generating win after win, and once they come to an end all the awarded flag features kick in, which most certainly triggers the avalanche cycle to start all over again, and the intense action takes off again.

Knight features

The Charging Knight sticks around on the left side and is always ready to come to the rescue. He randomly charges the queue at the end of an avalanche flow by pushing everything that comes in his way down into the queue. Symbols in the queue are used to create new winning clusters and to boost existing clusters on the symbol grid. A queue with big symbol groups brings a lot of action and its hypnotic to see how winning clusters explode, refills the grid and how the queue works in your favor to generate win after win. Bonus symbols and wilds are too heavy for the Charging Knight to push so they are kept on the symbol grid.

The Smashing Knight oversees the symbol grid in the upper left corner and randomly smashes his mace so that the entire game view shakes and all the symbol groups in the queue increase by one.

The Counting Knight is the calmest of the three knights. Analytical as he is, he keeps track of the size of the winning clusters and hands out life-saving features through his six different flags. All winnings are counted regardless of size, but the larger the cluster, the more the meter increases.

Flag features

Winning clusters fill up the meter which awards a flag feature once it is filled to the top. The larger cluster the more the meter fills up. Awarded flag features come into play when the avalanche flow has come to an end. All flag features most likely initiate a new avalanche flow and potentially additional wins. Some of the features even bring a guaranteed win.

Inferno

All low value symbols are removed from the symbol grid which initiates a new avalanche flow and potentially additional wins.

Extra Wilds

3-15 Wilds are randomly placed on the symbol grid potentially generating new cluster wins, which in turn start a new avalanche flow.

Super Size

Suddenly a big symbol of size 2x2, 3x3 or even 4x4 appears from the sky and lands on the symbol grid generating a guaranteed cluster win. A new avalanche flow is initiated by the cluster win.

Charge

2-5 rows of symbols are pushed down to the queue which initiates a new avalanche flow with a bigger queue potentially generating significant wins.

Epic Charge

It is a guaranteed retrigger of the avalanche flow since the whole symbol grid is emptied and all symbols are pushed to the queue. Thereafter additional symbols drop in and the avalanche flow starts off using the big queue.

Boosted Queue

With this flag feature the order of the queue doesn't matter, everything can be used simultaneously generating numerous cluster wins on the symbol grid. A new avalanche flow is initiated after the cluster wins.

Free drops bonus game

A lucky hit of three bonus crown symbols triggers the Free drops bonus game. It awards 5 free drops with a boosted persistent meter which makes it much easier to trigger the flag features. The queue is also persistent between free drops which most likely will generate significant cluster wins.

Display modes

We believe people are different, and enjoy playing differently. Therefore when playing Micro Knights, the gaming experience is flawless regardless of what display mode is chosen. Functionality and icons are kept the same to ensure recognition between the different modes.

All ELK games are Mobile First and can be played on desktop as well as on mobile. Being Mobile First is essential since the smartphone is always accessible, and given the high level of hardware capabilities the gaming experience needs to be impressive.

Portrait mode

Portrait mode is ideal for people on the move. It brings some additional requirements in terms of one-handed access. All functions and settings are accessible by the usage of your thumb. The navigation in portrait mode is well thought through and focused on vertical movement and touch functionality.

All functionality is easy accessible and icons are kept the same to ease transition between different modes.

Landscape mode

All ELK games can be played in landscape mode. Navigation in landscape mode is focused on horizontal movement and touch functionality. All functionality is easy accessible and icons are kept the same to ease transition between the different modes. Simply turn your smartphone into your preferred mode.

Desktop mode

Mobile First is the core functionality, yet all ELK games are designed to provide an equally excellent gaming experience on desktop. The visual presentation is adjusted to suit the higher resolution a desktop usually provides.

General features

Betting strategies

All ELK games come with Betting strategies, which are highly appreciated by players worldwide. There are four unique strategies, which all apply to different type of gaming behavior. (*Read more about Betting strategies on the next page.*)

Auto Spin

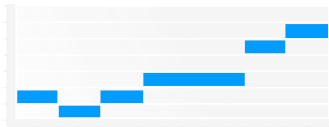

All ELK games support **Auto Spin**. Click the Auto Spin button or simply hold down the Spin button to activate the Auto Spin menu and choose the number of spins to run.

Options for Auto Spin may differ due to different regulations.

Betting Strategies

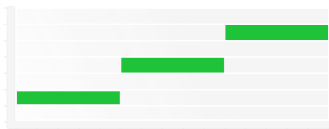

Many players change their bet size based on the outcome of previous spins. ELK has introduced a new way of playing casino games with the launch of Betting Strategies. A betting strategy is a predefined betting pattern that automatically changes the bet level depending on a chosen set of rules. A player can change or turn off the betting strategy after any spin. Betting Strategies work well in combination with Auto Spin.

Optimizer Bets a % of balance

The bet level will be changed automatically to a percentage of the player's balance. When the balance increases the bet level follows up automatically, and vice versa when the balance decreases.

From 1% (*casual player*) to 10% (*high roller*) of the total bet balance.

Leveller Raise on 5 concurrent losses

The bet level will increase 2 steps after 5 concurrent losing rounds. After another 5 losing rounds the bet level will increase 2 more steps.

Bet levels will be reset to base level after a winning round.

Booster Raise on loss

The bet level will increase one step after every losing round until reaching 4 levels above base level (e.g 10 times base level).

Bet levels will be reset to base level after a winning round.

Jumper Raise on win

The bet level will increase after every winning round until reaching 4 levels above base level (e.g 10 times base level).

Bet levels will be reset to base level after a losing round.

Micro Knights Game Data

Return to player: **96.0 %**

Volatility: **6 of 10**

Exposure: **2 500 x bet**

Hit Frequency: **36.9 %**

Max win: **250 000 coins**
(250 000 EUR)

Bet levels: **0.20-100 EUR**
or the equivalent in
other currencies

Paylines: **Cluster pays**

Game id: **10041**
NYX game id: **110041**

Recommended size and ratio for desktop browsers

For the optimal gaming experience,
ELK Studios recommend launching
the game in 1600x900 resolution.
If scaling is required, use 16:9 ratio.

Technology

Our games uses state of the art
web technologies including support
for canvas and WebGL. The client
detects the capabilities of the
device regardless if the player
is running on a desktop, tablet
or mobile.

The game client will then optimize
the gaming experience based on
those parameters.

Mobile First!

ELK Studios

ELK is an innovative casino game studio placed in the heart of Stockholm. We develop casino and lottery games with a focus on new devices. Currently all our games are developed for Mobile First! All our games are of course also available on desktop and tablets.

Our games are developed and compiled in Sweden, and we use well known test centers such as Trisigma, Nmi and Gaming Associates to certify them. Once released, all games are operated by partners or operators who hold the license in each market.
