GAME FEATURES

CALL TO ARMS

Call to Arms

Two Scatter symbols triggers the Call To Arms and applies two normal hearts.

If the third Scatter symbol lands during this mode, it triggers Team Assemble Freespins and restores any normal hearts which has been lost.

The game mode ends as soon there are no more hearts left.

Collectors

The Collector is enabled whenever a Jumping Wild animal is in play.

Each Collector has a visual connection to its corresponding Jumping Wild by color and type.

Whenever a car gets stopped by the Jumping Wild, increases the corresponding Collector value by 1.

If the Collector reaches its cap count by 5, it triggers the upgrade feature by enhancing its Jumping Wild depending on the type.

When upgrade feature is being triggered, upgrade a normal heart to become an armored heart from left at the heart list.

If any heart is missing, add an armored heart from the left on the heart list instead.

The Collectors counter gets removed if the cap has been reached.

Papa Bear

Acts as a Jumping Wild by moving to a random position inside the Battle Area(reel 2, 3 and 4), between rounds.

Below explains how the Papa Bear Wild works:

- When active, a general multiplier gets enabled.
- Tries to move 1 step every second spin and in any direction.
- Can only block a car once by damaging it for two hit points from left and right.
- Whenever a car gets stopped, increase the general multiplier by 1x to maximum of 5x and its Collector by one.

If its Collector reaches the cap by 5:

- Apply a permanent x2 multiplier on the Jumping Wild until the end of the bet.

Fred The Rabbit

Acts as a Jumping Wild by moving to a random position inside the Battle Area(reel 2, 3 and 4), between rounds.

Below explains how the Fred The Rabbit works:

- Acts as a Trapper.
- Moves anywhere on every spin inside the Battle Area.
- Can block a car multiple times by damaging it for one hit point from left and right.
- Whenever a car has been stopped, it leaves behind a Wild from its current position then jumps to a new empty position.

If its Collector reaches the cap by 5:

During its first jump, apply a Trap once on its starting position. The Trap can only block and damage a car once and turns itself to a Wild if the car got stopped by it. If the Trap fails to stop or hit any car, it gets removed before the spin stops.

Deer Joe

Acts as a Jumping Wild by moving to a random position inside the Battle Area (reel 2, 3 and 4), between rounds.

Below explains how Deer Joe works:

- Acts as a Split Wild and triggers only if it blocks a car.
- Tries to move 1 step on every spin and in any direction.
- Can only block a car once by damaging it for one hit point from left and right.
- Whenever a car gets blocked, it splits all the symbols on the same row and direction where the car comes from.

If its Collector reaches the cap by 5, the Split feature will now slice all the rows instead of one.

GAME FEATURES

Hilly and Billy Cars

Gets enabled whenever animals are in play and triggers only between spins.

There are two types of cars:

Green - Hilly's Car (1 Hit point)

- Always comes in first on every round.
- Requires to be hit once to be stopped.

Red - Billy's Car (2 Hit points)

- Only comes in on every fifth round during Team Assemble or no every round during Junkyard Assault.
- Requires to be hit twice to be stopped.

Whenever any car comes into play, it travels across the reel area starting from the right side and on a random row.

If a Jumping Wild manages to block the car, remove one hit point from it. If its hit-point reaches zero, the car gets stopped.

If the car manages to traverse the area from the right without getting stopped, the car will pick again a random row and traverse starting from the left side.

A successful back and forth will either damage an armoured heart or remove a normal heart starting from the right on the heart list.

The feature stops whenever there are no more hearts in play.

Roadblock

Gets triggered by collecting a total of 20 hits which gets enabled for the next spin.

The feature starts by restoring any normal hearts and transforms all the Jumping Wilds to cover a whole row each on the Battle Area.

When applied, Hilly and Billy cars come into play and hits one row each randomly and triggers a feature based on the row hit:

- Top - Adds one Wild randomly on reel 5.
- Middle - Split all the rows on Reel 5.
- Bottom - Multiply the 3x3 Wild by Two

This order will always be the same and each row can be hit twice.

When both of the cars have been stopped, all three of the rows now convert into one big 3x3 Wild, covering the whole Battle Area.

After the payout has been done, the 3x3 Wild now splits back into the Jumping Wilds and the Total Collector now starts from 0.

GAME FEATURES

Team Assemble

Triggers by having collected a total of 3 Scatters during the Base Game or Call To Arms.

When triggered, apply three hearts or restore any normal hearts that have been lost.

The Red car gets enabled and comes in together with the green car during every fifth spin.

Can traverse to the bonus feature Junkyard Assault if all three of the Jumping Wilds have been upgraded.

The game mode ends as soon as there are no more hearts left.

Junkyard Assault

Triggers only if all the three Jumping Wilds have been upgraded.

When triggered, apply three hearts or restore any normal hearts that have been lost.

The red car now comes into play on every spin as same as the green car.

The Jumping Wilds individual Collectors get replaced with one Total Collector starting from 0 which now triggers the Roadblock every time it reaches its cap.

The game mode ends as soon as there are no more hearts left.

Kings of the Road

The max payout of the game is 11,091 times the base bet.

When the total win exceeds this amount, the game round will end and 11,091 times the base bet is awarded.
