

DJ WILD

For one night you are the DJ

Version 1.0

With new Betting Strategy – Optimizer

For one night you are the DJ! Imagine the crowd filling up the stadium. You are in top shape and it's time to enter the stage. 50,000 fans are screaming for more music. Your gameplay makes the mix of the night.

DJ WILD is a classic 5 reel, 3 row DJ video slot featuring Respins, Sticky Wilds, Expanding Wilds and a Jackpot Wild Symbol. This game was built for mobile first and is the first slot ever letting the symbols cover 100% of the mobile screen. The game has 20 paylines, 10 lines paying left-right and vice versa.

The player is trying to capture DJ WILD symbol on reel 1, 2, 4 and 5. Once it hits, the mix intensifies and the symbol expands horizontally or vertically covering 2 or 3 symbols. After payout, a Respin is triggered with the expanding Wild made Sticky. During respins extra Wilds are added to the reels to increase the chance of hitting another DJ WILD, triggering more respins. If reel 1, 2, 4 and 5 are covered with Wilds, the Jackpot Wild is added to the middle reel giving a chance to hit the Jackpot win.

DJ WILD is a volatile game, geared to provide a maximized mobile casino experience. In order to create the ultimate experience, all animations are synced to the beat of the soundtrack through a software DMX light controller.

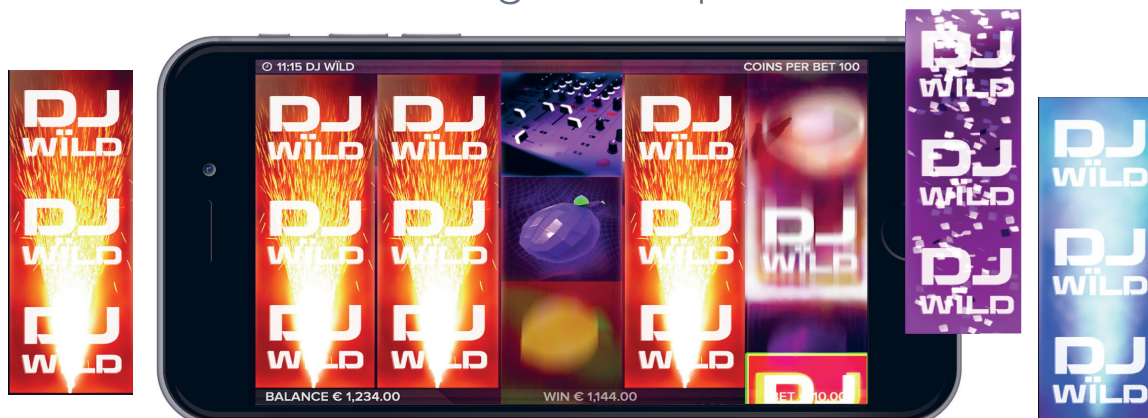

The stage is yours...

The soundtrack Fantazize was created by one of the hottest DJs in Stockholm, the home of DJ's like Swedish House Mafia and Avicii.

BETTING STRATEGIES

Are you looking for more action?

Many players change the bet size based on the outcome of previous gameplay. ELK introduced a new way of playing casino games with the launch of BETTING STRATEGIES. A betting strategy is a predefined betting pattern that automatically changes the bet level depending on a set of rules. A player can change or turn off the betting strategy after any bet. Betting Strategies work well in combination with Auto Play.

Optimizer – bets a % of balance

Your bet level will be changed automatically to a percentage of your balance. When the balance increases the bet level follows automatically, and vice versa when the balance decreases.

From Casual player (1%) til High roller (10%) of the bet balance.

Leveller – raise on 5 concurrent losses

The bet level will increase 2 steps after 5 concurrent losing rounds. After another 5 losing rounds the bet level will increase 2 more steps.

Bet levels will be reset to base level after a winning round.

Booster – raise on loss

The bet level will increase one step after every losing round until reaching 4 levels above base level (e.g 10 times base level)

Bet levels will be reset to base level after a winning round.

Jumper – raise on win

The bet level will increase after every winning round until reaching 4 levels above base level (e.g 10 times base level).

Bet levels will be reset to base level after a losing round.
